

## 1.open xampp

## 2.klik start apache

### 3.open Adobe Dreamweaver

### 4.klick new

5. pilih php dan klick create

6. halaman awal

## 7.adalah kode form login

```
1 <?php
2
3 session_start();
4 function login(){
5     echo '<table>
6
7         <form method="post" action="">
8             <tr>
9                 <td> Username</td><td><input type="text" name="user"></td>
10            </tr>
11            <tr>
12                <td>Password</td><td><input type="text" name="pass"></td>
13            </tr>
14            <tr>
15                <td></td><td><input type="submit" name="submit" value="Login"></td>
16            </tr>
17        </form>
18    </table>';
19 }
20
21
22
23
24
25 //jika tombol login diklik
26 if(isset($_POST['submit']))
27 {
28     if($_POST['user']=="Admin" && $_POST['pass']=="Admin")
29     {
30         // disini code ketika login berhasil
31         // abaikan saja karna pembahasan kali ini adalah ketika login gagal
32     }
33     else
34     {
35         //jika terdapat session bernama "auth"
36         //untuk penamaan session bebas
37         if(isset($_SESSION['auth']))
38         {
39             //jika user gagal masuk selama 3 kali atau lebih
40             if($_SESSION['auth']>3 || $_SESSION['auth']==3){
41                 //set nilai session "auth" ke 4
42                 $_SESSION['auth']=4;
43                 //jalankan function blokir_user
44                 blokir_user();
45             }
46             //jika tidak
47             else{
48                 //session "auth" ditambah 1
49                 $_SESSION['auth']=$_SESSION['auth']+1;
50                 //jalankan function login()
51                 login();
52             }
53         }
54         //jika tidak ada session "auth"
55         else{
56             //daftarkan session "auth", dan beri nilai 1
57             $_SESSION['auth']=1;
58             //jalankan function login()
59             login();
60         }
61     }
62 }
63
64 //jika tombol login tidak diklik ya tampilkan form loginnya
65 else
66 {
67     //jalankan function login()
68     login();
69 }
70
71 function blokir_user(){
72     echo "<h1> Anda telah diblokir ! </h1>";
73 }
74
75 //ini script untuk menampilkan brapa kali user mencoba login
76 if(isset($_SESSION['auth'])){
77     echo $_SESSION['auth'];
78 }
79
80 ?>
```

The screenshot displays the Adobe Dreamweaver application window. The 'File' menu is open, and the 'Save As...' option is highlighted. The menu items include: New... (Ctrl+N), Open... (Ctrl+O), Open Recent, Close (Ctrl+W), Close All (Ctrl+Shift+W), Save (Ctrl+S), Save As... (Ctrl+Shift+S), Save All, Save All Related Files, Save as Template..., Revert, Attach Style Sheet..., Import, Export, Print Code... (Ctrl+P), Real-time Preview, Validate, Compare with Remote Server, Design Notes..., Page Properties..., and Exit (Ctrl+Q). The background shows a code editor with PHP code for a login form. The DOM panel on the right indicates it will display the DOM structure of the HTML document.

The screenshot shows a Windows desktop with a taskbar at the bottom containing icons for various applications including Internet Explorer, Google Chrome, and several instances of a web browser. The main window is a web browser displaying a PHP file editor. The editor shows a PHP script with the following code:

```

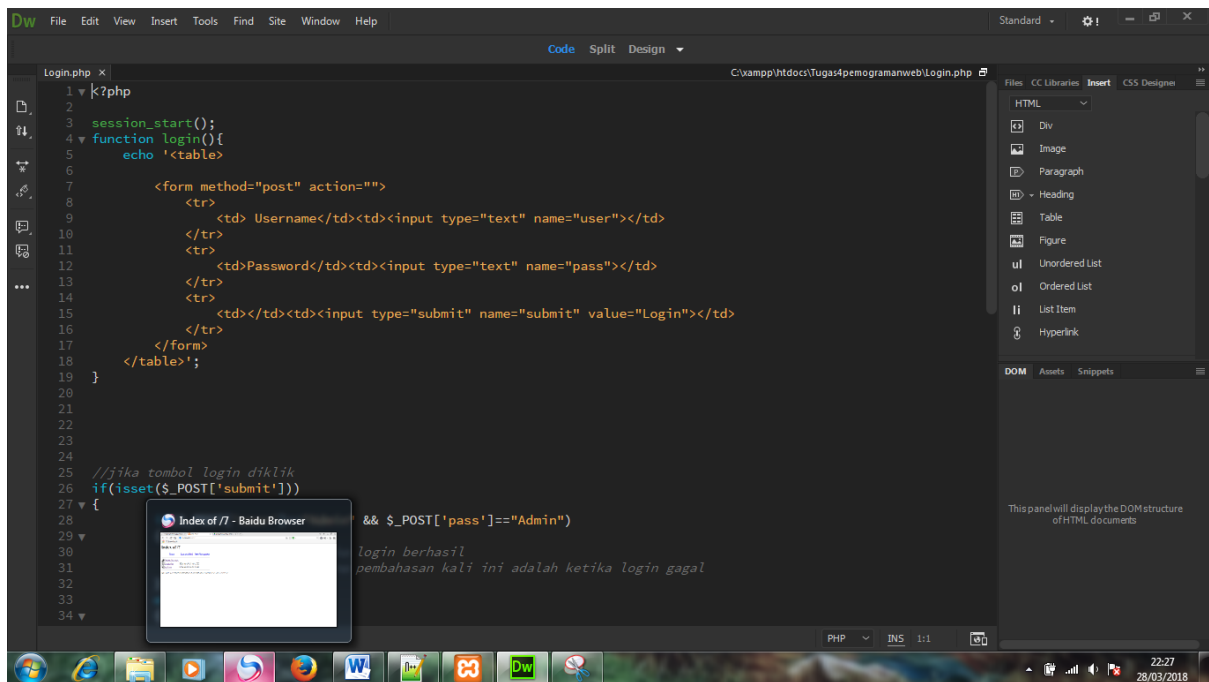

1 <?php
2
3 session_start();
4 function login(){
5     echo
6
7
8
9
10
11
12
13
14
15
16
17
18 }
19
20
21
22
23
24
25
26
27
28
29
30
31
32
33
34

```

A file explorer window is open, showing the contents of the 'Local Disk (C:)' under the path 'xampp >htdocs'. The file list includes folders like 'img', 'My Smart', 'pertemuan1', 'pertemuan4', 'pertemuan5', 'pertemuan6', 'template', 'TeoriPemogramanwebc', 'Tugas4pemogramanweb', and 'Tugaspemogramanwebc'. The file 'Tugas4pemogramanweb' is selected. The 'Save As' dialog box is also open, showing the file name 'Login' and the save type 'PHP Files (\*.php;\*.php3;\*.php4;\*.php5;\*.tpl;\*.php-dist;\*.phtml)'. The 'Open' button is highlighted.

## 10.open browser

## 11.Tampilan akses localhost

12.Salah username dan password

The screenshot shows a web browser window with two tabs. The active tab is titled 'localhost:50/Tugas4pemo' and the address bar shows 'localhost:50/Tugas4pemogramanweb/Login.php'. Below the address bar is a toolbar with a home icon and a text input field containing 'Import favorit'. The main content area of the browser displays a login form with two text input fields labeled 'Username' and 'Password', and a 'Login' button below them. The number '1' is printed below the browser window.

1

13.kedua wrong

The screenshot shows a web browser window with two tabs. The active tab is titled 'localhost:50/Tugas4pemo' and the address bar shows 'localhost:50/Tugas4pemogramanweb/Login.php'. Below the address bar is a toolbar with a home icon and a text input field containing 'Import favorit'. The main content area of the browser displays a login form with two text input fields labeled 'Username' and 'Password', and a 'Login' button below them. The number '2' is printed below the browser window.

2

14.ketiga wrong

15.gagal login lebih dari 3 kali otomatis terblokir
